

## ***Excellence in Information Security Testing Awards***

Excellence in Information Security Testing (EIST) Awards recognize vendors for outstanding achievement in the area of information security certification testing with ICSA Labs. The award is based on a company achieving five, ten, fifteen or twenty years of continuous testing with ICSA Labs.

It takes significant vendor dedication, discipline and resources to not only navigate their product through ICSA Labs' rigorous security testing to attain certification, but to continue those efforts to maintain it. For this reason vendors who have received the 5, 10, 15 and 20 year EIST awards have demonstrated their dedication and ability to persevere through the rigors of ICSA Labs testing and maintain the quality of their security products. Veteran vendors also make greater use of ICSA Labs' testing as they work closely with technical analysts, leverage criteria for development and participate in ICSA Labs consortia – all which contribute to improved products that benefit their customers and the security ecosystem.

### **Congratulations to all 2016 EIST Award Winners!**

#### **10 Years**

#### **5 Years**

### ***Ask for ICSA Labs Certified Products***

Vendors participating in ICSA Labs' certification programs benefit from the breadth and depth of twenty-five years of security product testing experience. A certification by an internationally recognized and accredited independent third-party organization with appropriate credentials immediately signifies that the product was consistently held to a high standard for quality. Ultimately, the longer a product participates in ICSA Labs' certification testing programs, the better the product.
